

IN THE CLAIMS

- Claims 1-3, 5-7, 10, 12, 13, 64, 69, and 81 are pending.
 - Claims 9, 11, and 16 were previously canceled.
 - Claims 4, 8, 14, 15, 17-63, 65-68, and 70-80 are canceled herein without prejudice to or disclaimer of the subject matter recited therein.
 - Claims 1, 2, 5, and 69 are amended herein.
 - Claim 81 is newly added.
1. (Currently Amended) A method implemented at least partially by a computer, the method comprising:
- presenting a word processing table having multiple cells within a document; and
- presenting a free floating field configured for insertion into the document;
- exhibiting spreadsheet features together with the word processing table when a user is editing the word processing table; and
- enabling a user to reference a cell in the word processing table when entering a formula into the free floating field;
- overlaying a formula edit box on a particular cell in the table to facilitate user entry of a formula into the particular cell; and
- resizing the formula edit box as the user enters the formula, while maintaining the size of the particular cell and table as a whole.
- wherein the method is provide by a single software architecture.

2. **(Currently Amended)** A ~~method~~, method implemented at least partially by a computer, the method comprising:
- presenting a word processing table and a free floating field within a document;
- exhibiting spreadsheet features together with the word processing table when a user is editing the word processing table; and
- presenting a first spreadsheet table supporting spreadsheet functionality and having multiple cells; and
- presenting a second spreadsheet table nested within a cell of the first table,
- wherein the document is a markup document, and the presenting comprises rendering the markup document.
3. **(Original)** The method of claim 1, wherein the word processing table has rows and columns, and the exhibiting comprises depicting row headers for the rows and column headers for the columns.
4. **(Canceled).**
5. **(Currently Amended)** A ~~method~~, method implemented at least partially by a computer, the method comprising:
- presenting a word processing table within a document;
- exhibiting spreadsheet features together with the word processing table when a user is editing the word processing table;

determining, upon selection of a cell in the word processing table, a type of contents in the cell; and
interpreting user entry based upon the type of contents in the cell,
presenting a first spreadsheet table supporting spreadsheet functionality and having multiple cells; and
presenting a second spreadsheet table nested within a cell of the first table.

6. **(Original)** The method of claim 5, wherein the determining comprises:
evaluating whether the type of contents is a formula or non-text data;
if the type of contents is a formula or non-text data, interpreting the user entry as applicable to spreadsheet functions; and
if the type of contents is not a formula or non-text data, interpreting the user entry as applicable to word processing functions.
7. **(Original)** The method of claim 5, wherein the determining comprises:
evaluating whether the type of contents is a formula;
if the type of contents is a formula, highlighting all of the formula and allowing editing in a formula edit box; and
if the type of contents is not a formula, placing a cursor in the cell.
- 8 and 9. **(Cancelled).**
10. **(Original)** The method of claim 1, further comprising:

presenting multiple word processing tables; and
enabling a user to reference a cell in a first word processing table when entering a
formula in a cell in a second word processing table.

11. (Cancelled).

12. (Original) The method of claim 1, further comprising:
modifying a value in a cell of the word processing table; and
upon modification, automatically recalculating any formula in the word processing table
that is affected by the modification.

13. (Original) A computer readable medium having computer-executable instructions that,
when executed on one or more processors, perform the method as recited in claim 1.

14-63. (Cancelled).

64. (Previously Presented) The method of claim 1, additionally comprising:
facilitating addition of one or more rows to the word processing table by operation of a
row addition control adjacent a lowermost row in the table; and
facilitating addition of one or more columns to the word processing table by operation of
a column addition control adjacent an outermost column in the table.

65-68. (Cancelled).

69. **(Currently Amended)** The user interface of claim 2 68, wherein one of the first and second spreadsheet tables contains a formula referencing contents of the other of the first and second spreadsheet tables.

70-80. **(Cancelled)**.

81. **(New)** The user interface of claim 5, wherein one of the first and second spreadsheet tables contains a formula referencing contents of the other of the first and second spreadsheet tables.
